

Calcium Octoate

Calcium octoate preserves paint film in the “open” form, thus supplementing effects of primary driers. It is a highly effective wetting and dispersive agent, promotes homogeneous drying of the coating in its thickness, what positively influences film hardness. It improves grind of pigment pastes.

Packing:

200 kg polyethylene drums, or, by agreement with the customer, containers, which do not deteriorate the properties of the material

Guarantee period of storage - 12 months

Quality data

in accordance with TU 2311-004-46913378-2004:

Ca, %	5 ± 0,2	10 ± 0,2
Appearance	Transparent, homogeneous liquid without suspensions and precipitate	
Mass fraction of non-volatile substances, %, not more than	60	66
Compatibility with white spirit	Нет разделения и осадения, допускается опалесценция	
Color or chromaticity according to iodometric scale, mg I ₂ /cm ³ , not more than	2	3
