

Dibutyltin Dilaurate

Packing:

20 kg canisters

Quality data:

Appearance at 25-30°C	Viscous homogeneous liquid without precipitate and foreign admixtures
Color	Yellow
Tin, Sn, %	18,2 -18,9
Viscosity, cPs	35 – 60
Density at 20°C, g/cm ³	1,05

Application: The product is used as a catalyst in reactions of esterification and interesterification. The catalyst is well soluble in esters. It is also used for varnish and paint systems on polyurethane base.
