

Lithium Neodecanoate

Lithium salt with branchy chain of synthetic fatty acid dissolved in carbohydrate of aliphatic series. The product is used in varnish and paint materials with high dry residue. It prevents the film shrinkage. It is also used as a catalyst of the esterification process in synthesis of unsaturated polyesters.

Packing:

200 kg polyethylene barrels, or, by agreement with the customer, containers, which do not deteriorate the properties of the material

Guarantee period of storage - 6 months

Показатели качества :

Lithium, Li, %	2,0 ± 0,1
Appearance	Transparent liquid without suspensions and precipitate
Density, g/cm ³	0,91
Color	Light yellow
